INTEGRAL PRINT GROUP

Print Artwork Setup Guide

Quick reference for preparing artwork. Exact production specifications vary by product; please confirm requirements with our team before submitting final files.

- Supply a print-ready PDF where possible.
- Set the file to the correct finished size.
- Include appropriate bleed and keep important content within a safe margin; confirm specifications with our team.
- Use suitable image resolution for the final print size and viewing distance.
- Prepare colour in CMYK where appropriate and understand that printed colours can differ from screens.
- Embed or outline fonts and check all linked images.
- Supply a visual proof, quantities, stock and finishing requirements.
